About myself

AI Engineer and Computer Engineer specialized in on-prem LLM products and applied MLOps, with end-to-end ownership from data and retrieval to evaluation and rollout. Built local LLM assistants that reduced manual steps and cut cycle time under strict privacy constraints. Python-first, vector search and retrieval pipelines, prompt/evaluation tooling, and reliable backends for serving. Research-grade rigor from solar telescope simulation (EST).

Skills

- LLM applications
- RAG
- agents
- prompt engineering
- LLM evaluation
- retrieval evaluation
- Python
- FastAPI
- Docker
- REST APIs
- CI/CD
- Git
- Vector DB
- Chunking
- Embeddings
- Document ingestion
- Pytorch

Language Skills

- **Spanish**: Mother tongue
- **English**
  - Listening: C2
  - Reading: C2
  - Spoken production: C1
  - Spoken interaction: C1
  - Writing: C1

Work experience

Independent AI Engineer — 08/04/2026 - Current

Tabaican Solutions | Santa Cruz De Tenerife, Spain

- Built AI assistant prototypes for SMEs using RAG, LLM APIs, document ingestion and workflow automation.
- Designed privacy-conscious GenAI architectures for customer-facing and internal business use cases.
- Developed deployment-ready backend components with Docker, FastAPI and vector databases.

AI Engineer — 12/03/2025 - 23/03/2026

3Doubles Producciones S.L. | Santa Cruz De Tenerife, Spain

- Built on-prem **LLM**assistants for studio workflows under strict privacy constraints, reducing manual steps cutting cycle time.
- Designed **RAG**pipelines (hybrid lexical+vector) with chunking.
- Implemented **Agentic AI**patterns (tool-using agents with planning and self-reflection) for multi-step tasks like complex natural language queries to industry software databases.
- Collaborated with producers and artists to turn pain points into agent workflows.

Python developer Internship — 01/08/2024 - 01/11/2024

Instituto de Astrofísica de Canarias | San Cristóbal de La Laguna, Spain

- Focused on Python programming of solar telescope simulations (EST project).

Backend Developer — 01/09/2022 - 01/11/2023

Solera Inc | Madrid, Spain

- Contributed to API development, business logic implementation and integration work in production-oriented software systems.
- Strengthened backend engineering fundamentals later applied to AI service deployment and LLM application backends.

Education & Training

Computer Engineering — 01/09/2017 - 01/07/2022

Universidad de La Laguna | San Cristóbal de La Laguna, Spain

Level in EQF: 6 | **Thesis:** Leishmania parasite detection in microscopic images

Research in Artificial Intelligence — 01/09/2023 - 01/09/2024

Universidad Internacional Menéndez Pelayo | Santander, Spain

Level in EQF: 7 | **Thesis:** Constrained rectilinear clustering problem with simultaneous routing
